The following is an Examiner's Statement of Reasons for Allowance:

1. The claimed invention is directed to a "Dual-Mode Flash storage Exchanger that transfers Flash-card Data to a Removable USB Flash key-Drive with or without a PC Host". The examiner has done complete search and found no prior art, alone or in combination, teaches or fairly suggests that "a dual-mode microcontroller coupled to the serial bus and coupled to the input-output bus, for operating in a card-reader mode and responding as a serial-bus peripheral to requests from the host computer when the host computer is connected, but for operating in an exchanger mode and originating data transfers as a local host of the serial bus when the host computer is not connected to the first serial-bus connector" in combination with other claimed elements as claimed in independent claim 1 and at least similar limitations in combination with other claimed elements in independent claims 14 and 18. Dependent claims 2-13, 15-17, 19 and 20 further limit the subject matter of the respective parent claims.

Furthermore, a typographical error in claim 12 has been corrected by an examiner's amendment enclosed herewith.
